

Notes

This stock programme catalogue contains all standard WINTER diamond and CBN grinding wheels for use on CNC tool grinding machines.

The selection of grinding wheels and their application is dependent on application and software of the machine manufacturer.

Some examples of grinding wheel combinations, mounted as spindle sets, are illustrated on pages 4 and 5.

Indications on application of each shape are given at the foot of the table in the respective section.

WINTER CNC diamond and CBN grinding wheels are suitable both for grinding with oil and with synthetic cutting fluids.

WINTER diamond and CBN grinding wheels are available ex stock, i.e. with a short delivery lead time.

In addition to this specific CNC grinding wheel range, WINTER has further catalogues of stock programmes:

- Grinding tool programme for the wood and plastics working industry (wood-working catalogues)
- Superstandard programme for tool making
- ID grinding catalogue.

If you have further questions on our grinding wheel programme, please contact our field service, our offices or the parent company.
